AcneLens — Blind Rating Sheet

Dermatologist: _____ PRC License No.: _____ Date: _____

Labeling rule. Inflammatory = any papule, pustule, nodule or cyst visible. Non-Inflammatory = only blackheads/whiteheads. Clear = no visible acne. Please label without looking at the AcneLens app or its results. Tick one box per photo.

Validation Certificate

I, the undersigned licensed dermatologist, independently classified the 85 photographs of the AcneLens Blind Photo Packet into Clear Skin, Non-Inflammatory acne, or Inflammatory acne. I did **not** see the AcneLens application's classifications before completing my ratings. My ratings were then compared photo-by-photo with the application's results by the researchers.
